1 List of FDs for the RLMS Schema:

- **Person** : pid → {pid, firstName, lastName, email, affiliation, startDate, endDate}
- **Student (ISA Person)** : pid → {pid, program}
- **Employee (ISA Person)** : pid → {pid, phone, office, supervisorPid}
- **Academic (ISA Employee)** : pid → pid
- **NonAcademic (ISA Employee)** : pid → pid
- **Faculty (ISA Academic)** : pid → {pid, position}
- **Administrative (ISA NonAcademic)** : pid → {pid, position}
- **Technical (ISA NonAcademic)** : pid → {pid, position}
- **Advises** : {academicPid, studentPid} → {academicPid, studentPid}
- **Laboratory** : labId → {labId, name, building, roomNumber, discipline, supervisorPid}
- **Attached** : {pid, labId} → {pid, labId}
- **ResearchProject** : code → {code, title, startDate, endDate, status}
- **Participates** : {pid, projectCode} → {pid, projectCode, role}
- **Budget** : budgetLine → {budgetLine, amountGranted, amountDisbursed, startDate, endDate, managerPid}
- **FundsLab** : {budgetLine, labId} → {budgetLine, labId}
- **FundsPrj** : {budgetLine, projectCode} → {budgetLine, projectCode}
- **EquipmentModel** : modelId → {modelId, commercialName, manufacturer, category, requiredEnvironment, trainingMandatory}
- **EquipmentUnit** : serialNo → {serialNo, acquisitionDate, purchaseCost, status, portable, modelId, labId}
- **Certification** : code → {code, title, issuingAuthority, validityPeriod, safetyLevel}
- **Requires** : {modelId, certCode} → {modelId, certCode}
- **Holds** : {pid, certCode} → {pid, certCode, issueDate, expirationDate, grade}
- **Reservation** : resId → {resId, submissionTS, plannedStart, plannedEnd, purpose, status, madeByPid, projectCode, approverPid}
- **Reserves** : {resId, serialNo} → {resId, serialNo}
- **Maintenance** : {serialNo, startTS} → {serialNo, startTS, endTS, type, description, cost, outcome, technicalPid}

- **CalibrationRecord** : {serialNo, calibDate} → {serialNo, calibDate, calibrationType, result, nextDueDate, remarks}
- **Consumable** : consId → {consId, name, unitOfMeasure, hazardLevel, reorderThreshold}
- **Supplier** : suppId → {suppId, name, contactEmail, phone}
- **Supplies** : {suppId, consId, labId} → {suppId, consId, labId, unitPrice}
- **Stocks** : {labId, consId} → {labId, consId, quantityOnHand, lasltRestockDate, storageCondition, technicalPid, monitoringSince}
- **Consumes** : {resId, labId, consId} → {resId, labId, consId, quantityUsed}

2 Problems:

- For the relations that don't have attributes other than the primary key, only the trivial "PRIMARY KEY → PRIMARY KEY"

3 Discussion:

- All team members had the same role throughout this project.
- No KEY challenges were encountered during this part.
- All of the applied conversions do not need major justifications because they are trivial.
